About Seminar

In today's knowledge-based society, innovation is the driving force of the economy on all levels and in all types of organizations. Due to high risks present when introducing new products and services, innovations are usually commercialized via isolated formal formations such as startups companies. Startup is an entrepreneurial venture which is typically a newly emerged, fast growing business that aims to meet a marketplace need. Entrepreneurial startups have high potential but are very scarce and represent the most precious human resource of every nation, which is why they should be fully supported. Startup companies are thus those that have ambition and potential to become big corporate giant and create a large number of new jobs. The seminar aims to understand nature and types of startups, financing opportunities for startups, requirement analysis and success mantra of startups.

Seminar Objectives

- To acquaint with startups and new ventures in Maharashtra.
- To study the opportunities and challenges in setting up startup.
- To share the success and failure stories on startup business.
- To know about financial scheme and assistance provided by government and financial institutions for startup business.
- To develop professional skills and create awareness of schemes & procedure among students.
